

“Medherbs” represents celandine phyto-tea of Potopalsky A.

Vishnevskiy I, Dobrovolskiy S.

Closed Joint-Stock Company “Medherbs”, Zhitomir, Ukraine

For the first time of many years history of celandine use by worlds’ nations for recovery and treatment, closed joint-stock company “Medherbs” represents phyto tea elaborated in accordance with formula of world-known Ukrainian scientist Anatoliy Potopalsky, who has defended a thesis about new anticancer celandine drug – amitozyn in 1966 and has written several books about celandine.

At present A. Potopalsky is the head of Institute of Health Promotion and Rebirth of People of Ukraine and the head of Charitable fund "Healer Given by Heaven" and at the same time he is working at sources of molecular recovery of people and environment while taking up a post of the head of Biologically Active Structure Substances Modifications department of Institute of Molecular Biology and Genetics of NAS of Ukraine.

He was chosen as a Man of the Year in 1996 in USA. The biography of A. Potopalsky, published in this country, is a biography of one of 500 recognized leaders of all times and nations. Together with colleges – Yaroslav Novitsky (who is at present citizen of Austria) and Maria Oliyovskaya (Lviv city), Anatoliy Potopalsky was nominated for obtaining the Nobel Prize in 2004.

Celandine, as an independent mean, especially in efficiently selected complexes with other healing herbs, is widely used for recovery and treatment different by birth and features clinical courses. Because of presence in its structure numerous alkaloids, organic acids, flavonoids, ethereal oils, ferments and mineral substances, celandine facilitates the organism's recovery and has healing effect on immunity, gastrointestinal tract, liver, pancreas, prostate, urogenital system, skin, musculoskeletal locomotor system and cardiovascular system. Celandine has special significance in prevention and treatment of benign and malignant growth and also such systemic diseases as polyarthritis, tuberculous lupus and disseminated sclerosis.

The expert researches concerning phyto-tea effectiveness and safety were conducted by the Folk and Alternative Medicine Committee of Ministry of Health of Ukraine and sanitary-epidemiological expertise of Ministry of Health of Ukraine (conclusion № 05.03.02-06/42959 from 27.10.2004).
